

# THE 91ST ANNIVERSARY OF THE ARMENIAN GENOCIDE

Mr. LEVIN. Mr. President, on Monday we observed the 91st anniversary of the Armenian genocide. On April 24, 1915, the Turkish Ottoman Empire began a coordinated campaign of deportation, expropriation, torture, starvation, and massacre which lasted 8 long years and left an estimated 1.5 million Armenians dead. The violence forced an additional 500,000 people to leave their homeland and live in exile.

The Armenian genocide is a shameful period in world history that highlights the catastrophic consequences of inaction in the face of violent persecution. It is a tragedy which could have and should have been prevented by the intervention of all nations who value freedom and peace. A retired Theodore Roosevelt wrote in 1918, "The Armenian horror is an accomplished fact. Its occurrence was largely due to the policy of pacifism this nation has followed for the last four years." Roosevelt argued for U.S. involvement "because the Armenian massacre was the greatest crime of the war, and failure to act against Turkey is to condone it; because the failure to deal radically with the Turkish horror means that all talk of guaranteeing the future peace of the world is mischievous nonsense."

It is important to make clear that the annual remembrance of the Armenian genocide is not a condemnation of our NATO partner, the present day Republic of Turkey. Indeed, it was the founder of the Republic, Mustafa Kemal Ataturk, who ended the Ottoman government.

Instead, the annual remembrance of the Armenian genocide presents us with an opportunity to both honor the memory of those that were lost and rededicate ourselves to working with our allies, including Turkey, to prevent any occurrences of persecution and genocide around the world.

Unfortunately, we know too well that the Armenian genocide was the first but not the only genocide of the 20th century, and millions more perished as additional genocides were perpetrated against innocent minorities in Europe, Africa, and Asia. In remembering the victims of past genocides, we must now turn our efforts to ending the first genocide of the 21st century in the Darfur region of Sudan.

Only by remembering the loss of family and loved ones and by working to alleviate the current suffering of others can we truly honor the victims of the Armenian genocide. That is the goal of the 91st anniversary remembrance of the Armenian genocide.

## EARTH DAY 2006

Mr. FEINGOLD. Mr. President, this past weekend we celebrated Earth Day. That celebration, begun in 1970 by the late Gaylord Nelson, a great environmental leader whose U.S. Senate seat I hold today, provides us the chance to

reflect on our environmental past, take stock of our present environmental situation, and formulate a vision for our environmental future.

We have much to be proud of in our past, especially the bipartisan initiatives that were produced in the 1970s, including the Clean Air Act, the Endangered Species Act, and the Clean Water Act. Unfortunately, our present environmental circumstances show we have a lot of work to do. Mercury pollution contaminates our waterways and threatens the health of our citizens, increased greenhouse gas emissions feed global climate change, and the majestic Great Lakes, a natural resource of particular interest to me and my fellow Wisconsinites, face such threats as invasive species and loss of wetlands. It is the future, though, that I urge Americans from all walks of life and from all across the country to focus on as they celebrate Earth Day this year.

Quite frankly, over the next few years we will face major decisions that will shape our relationship to our natural resources. We can make decisions that demonstrate we want a future that recognizes that when we disrespect and dishonor the planet, we, in fact, disrespect and dishonor ourselves, or by failing to act or by making short-sighted choices, we can turn our backs on our responsibility to pass on to future generations a vibrant and living planet.

Despite what is at stake, there is reason for hope. One of the most pressing challenges we face is that of making a commitment—both individually and collectively—to adopting sustainable energy habits that will serve the country for years to come. Our Nation, throughout its history, has faced challenges that we have overcome based on our ingenuity and our unwillingness to fail. It is this attitude that must be embraced today as we look to our energy future.

We must challenge ourselves to adopt a new energy vision for the 21st century. This new vision involves moving away from our dependence on oil, a source of energy that puts our environment, our national security, and our economy at risk. We all know that the burning fossil fuels, like oil, emits tremendous amounts of greenhouse gases into our atmosphere and that these gases fuel global warming. We all also know that global climate change is a problem plagued by a lack of leadership by the current administration and by its allies in Congress. Getting real about global warming—which must happen soon—will require a commitment to reducing our dependence on oil as opposed to continually fighting about opening up pristine areas, including the Arctic National Wildlife Refuge, for oil drilling. Reducing our dependence on oil will also make us more secure. Given that we have less than 3 percent of the world's proven oil reserves here in the United States, we will be dependent on others for our fuel

until we get serious about using biofuels that can be produced here at home.

A new energy future will not create itself—it will require a dedicated effort by individuals across the country and by decision makers at all levels. This new energy future can be built on efforts to be more efficient, efforts to only use only what we need, and efforts to use renewable sources of energy. While the Federal Government has failed to take bold action, Americans are forging ahead, actually leading the way. For example, students at universities are holding competitions to reduce energy use, and nearly 200 cities are part of a nationwide movement to reduce greenhouse emissions in their cities to 7 percent below 1990 levels by 2012.

But more must be done, and Americans must demand accountability and leadership from their Federal elected officials.

So as we come together on Earth Day 2006, let's make a commitment to each other and to future generations to rise to the challenge of securing a new energy future for our country, for this is not only one of the most important environmental commitments we can make to each other, but it is also a decision about our national security and our economy. Let's work toward an environmental future that our children's children will, years from now, reflect upon as a turning point in our history, a time during which we came together and worked for the best interest of humanity, across the globe.

## ADDITIONAL STATEMENTS

### HONORING ARMY LIEUTENANT JEROME N. SHAPIRO

• Mr. LEVIN. Mr. President, this week, as we observe Holocaust Remembrance Day, Yom Hashoah, I would like to take a moment to recognize Stephanie Mellen of Troy, MI, for her tireless and enduring efforts to honor the memory of her father and help ensure that the horrific events of the Holocaust will never be forgotten.

On May 7, 1945, Ms. Mellen's father, 1Lt Jerome N. Shapiro, led the team that captured Air Marshal Hermann Goering, the de facto leader of Nazi Germany following Adolf Hitler's suicide. Eighty miles behind enemy lines in Austria, Lieutenant Shapiro and three others caught Goering and his entourage of 78 people. Goering calmly surrendered his weapon to Lieutenant Shapiro, a Jewish American, and was held under Lieutenant Shapiro's command at Fischhorn Castle in Zell Am See, Austria, until he was transferred to Allied headquarters 2 days later. Hermann Goering was the principal defendant at the Nuremberg Trials the following year, and Lieutenant Shapiro continued as part of his guard detail during the trial.

Lieutenant Shapiro was hesitant to talk about his role in Goering's capture, but Stephanie Mellen began to
